

Collaboration Programme

To work successful in teams, it is important that the team members are aware of the dynamics of group processes and communication. Also the environment in which the team members and their (project) colleagues function is important, as well as defining everyone's role as member of the team. With this Collaboration Training, each team member knows the terms that are required to work successfully together, and his own influence in it.

You wish to learn more about this training? +31 (0)541 - 663 029 or info@jahetwerkt.nl

Programme

- Group dynamics;
- Meetings;
- How you can influence group dynamics: interventions in teams;
